

Client Requests

Rohill Nand, Jae Joo (STUDIO DevOps)

We will schedule another meeting for next Thursday (March 25th)

Resources Required

- Training VM (linux commands)
- Assignment (bash script) VM
- 3 VMs to explore iptables

Each VM requires Users:

- Student
 - Manager (for lecturer to access)
-
- Creation of Resources must be automated using a student list (csv file) from Otago Polytechnic Administration.
 - Each environment given to students should be easily replicable with templates.
 - Other concerns include authorization, access methods (IPs SSH)

We will explore the solution with Docker Networking.

We will explore PowerShell scripting to automate the creation of VMs.
